E.  $4(5 + 2y) - 3(3y + 7)$

Give a brief description of the kind of person you would look for to properly assess your abilities

Fishers 96 students signed up for the group Talent contest if all the groups had the same number of students how many groups can be formed 3 groups

4 groups

5 groups

either 3 groups or 4 groups

The transactional model builds on the linear and interactive models by recognizing that in many communicative interactions, the speaker and listener are simultaneously encoding and decoding messages within an environment that includes the context of the situation as well as the personal and cultural backgrounds of each communicator. Thus, there is not a delay in acting as a sender or receiver, but rather, both parties communicate (provide feedback, encode, and decode messages) simultaneously.
