

Marcos launched a small business by inventing, patenting and commercializing a new hand tool. Big Co. has produced a cheaper knock-off version of the tool and is violating Marcos' patent. Litigating a patent will cost at minimum several hundreds of thousands of dollars, which Marcos cannot afford. In this situation, Marcos can:

- a. Hire a litigator from a large law firm who will assemble a large and highly qualified team and charge hourly fees.**
- b. Hire a litigator from a small law firm who will charge hourly fees.**
- c. Hire a litigator who will agree to a contingent fee structure and require payment only if Marcos obtains a settlement or jury verdict.**
- d. Save the cost of hiring a lawyer by representing himself in court.**

Answer:

C) Hire a litigator who will agree to a contingent fee structure and require payment only if Marcos obtains a settlement or jury verdict.

Explanation:

Generally when lawyers agree to a contingent fee structure is because they are convinced their chances of winning are high. Lawyers will accept a fixed percentage of the amount recovered, usually this percentage is around 1/3 of the final settlement.

This type of agreement is very useful since you don't need to invest a lot of money, and the lawyer's pay comes from the money awarded by the jury (or a settlement).

In a muscle cell, myosin binds to actin to cause muscle contraction. Researchers have found that rabbit muscle myosin binds to actin from an amoeba. How can this be?

What is the mean of the data set?

85, 97, 84, 88, 95, 100, 81

Snow Co. began operations on January 2, 2017. It employs 15 people who work 8-hour days. Each employee earns 10 paid vacation days annually. Vacation days may be taken after January 10 of the year following the year in which they are earned. The average hourly wage rate was \$24.00 in 2017 and \$25.50 in 2018. The average vacation days used by each employee in 2018 was 9. Snow Co. accrues the cost of compensated absences at rates of pay in effect when earned. Prepare journal entries to record the transactions related to paid vacation days during 2017 and 2018.

Complex sentence using the word acrimonious

After Alexander the Great invaded Egypt, the Egyptians

Carbon (C) and hydrogen (H) are pure substances. Each is made of only one type of atom, but carbon atoms are different from hydrogen atoms. Carbon and hydrogen chemically combine to form methane (CH₄) Based on this information,
