

**Which statement describes the blood type of a person with the alleles IAIB?
It is type AB because A and B exhibit incomplete dominance. It is type AB
because A and B are codominant. It is type O because A and B are
codominant. It is type A because A and B exhibit incomplete dominance.**

It is type AB because A and B are codominant.

Explanation:

It is the existence or the absence of the type of proteins such as A and B decides the type of blood in a person. These proteins A and B are present on the cells surface of red blood. The presence of two combo of A and B results in the four type of blood such as Type A, Type B, Type AB and Type O. In Type A blood the proteins that is present is only A. In Type B the B protein is only present. In Type AB, the proteins present are A and B. In Type there will be neither presence of A nor the presence of B.

The genotype is responsible for the generation of the type of blood. These genotypes, $iAiA$ or Iai produce type A protein. The genotypes $iBiB$ or iBi produce type B proteins. The genotype $iAiB$ produce the proteins A and B. ii genotype produces type O protein.

Answer:

It is type AB because A and B are codominant.

Explanation:

Both A and B are dominant, O is recessive.

Which statement best describes the Odyssey? a. The Odyssey was the earliest submarine used by the ancient Greeks to explore the many surrounding seas.
b. The Odyssey is a poetic recognition of human ability in the face of grave dangers.
c. The Odyssey was the series of trips between ancient Greece and China that established trade routes
d. The Odyssey is the name of an ancient species of bird that inspired Zeus during his time on Mount Olympus.
70%days in june were sunny how many days were sunny

fix the possessive noun in the sentence the World Cups popularity is growing more and more every year in the U.S .

Which conflicts are types of external conflict in a literary work? Select three options. A character feuding with a close friend a character dealing with feelings of inadequacy a character living in a harsh environment a character being judged by the community a character deciding on the best course of action

All bags entering a research facility are screened. Ninety-seven percent of the bags that contain forbidden material trigger an alarm. Fifteen percent of the bags that do not contain forbidden material also trigger the alarm. If 1 out of every 1,000bags entering the building contains forbidden material, what is the probabilitythat a bag that triggers the alarm will actually contain forbidden material?(a) 0.00097(b) 0.00640(c) 0.03000(d) 0.14550(e) 0.97000

What did the researchers, who identified the hawthorne effect, see as evidence that employee performance was influenced by something other than the physical work conditions?

There is a car wash and the school wants to raise \$600. There are 8 teams. Each team washes 2 cars per hour. The car wash is 5.5 hours. Each team takes two 15 minute breaks. How much should the teams charge each car if they want to raise \$600?

As time goes on, technology is likely to _____. a. Increase in complexity

b. Decrease in complexity

c. Stay at the same complexity

d. No one really has any idea

Monthly Payments and Finance Charges. Kimberly Jensen of Storm Lake, Iowa, wants to buy some living room furniture for her new apartment. A local store offered credit at an APR of 16 percent, with a maximum term of four years. The furniture she wishes to purchase costs \$4,800, with no down payment required.

Make the following calculations:

Which metric unit is used to measure fluids? Liters

Meters

Grams

Ounces

The following excerpt is taken from W.B. Yeats's poem "Easter, 1916," in which he examines his feelings toward those who took part in the Easter Rising in Ireland. Which set of lines suggests that Yeats considered the rebels inflexible? Too long a sacrifice

Can make a stone of the heart.

O when may it suffice?

That is Heaven's part, our part

To murmur name upon name,

As a mother names her child

When sleep at last has come

On limbs that had run wild.

What is it but nightfall?

No, no, not night but death;

Was it needless death after all?

For England may keep faith
For all that is done and said.
We know their dream; enough
To know they dreamed and are dead;
And what if excess of love
Bewildered them till they died?
I write it out in a verse—
MacDonagh and MacBride
And Connolly and Pearse
Now and in time to be,
Wherever green is worn,
Are changed, changed utterly
A terrible beauty is born.

Choices

A) Too long a sacrifice
Can make a stone of the heart.

B) We know their dream; enough
To know they dreamed and are dead;

C) And what if excess of love
Bewildered them till they died?

D) Now and in time to be,
Wherever green is worn,
Are changed, changed utterly
A terrible beauty is born.

What is a subordinate clause

Before you go further with your plan for online dating, you want to find out how accurate online profiles are. One study checked online claims against actual measurements and found that _____ of the dating profiles contained lies about height, weight, or age.

Find the x- and y-intercept of the equation $5x+3y=15$

Why does darkness affect the light-independent reactions of photosynthesis? Plants stop their daytime activities and rest during the night much like animals do.

Light independent reactions need more heat energy than nighttime temperatures often provide.

Light independent reactions require the energy gathered in the thylakoids.

Mitochondria produce sugars more effectively in the darkness than chloroplasts do.

Use the rules for long division to divide 724 by 11

It has been claimed that an insect called the frog hopper (*Philaenus spumarius*) is the best jumper in the animal kingdom. This insect can accelerate at $4\,000\text{ m/s}^2$ over a distance of 2.0 mm as it straightens its specially designed "jumping legs." Assuming a uniform acceleration, what is the velocity of the insect after it has accelerated through this short distance.

Suppose that there are two industries, A and B. There are five firms in industry A with sales at \$5 million, \$2 million, \$1 million, \$1 million, and \$1 million, respectively. There are four firms in industry B with equal sales of \$2.5 million for each firm. The four-firm concentration ratio for industry A is: .9
