

A municipality would use general obligation bonds to finance all of the following EXCEPT the:

- A. addition to an existing school building**
- B. construction of a new town hall**
- C. construction of an industrial park**
- D. addition of traffic lights to main intersections**

Answer: The correct answer is "C. construction of a new industrial park."

Explanation: A municipality would use general obligation bonds to finance all of these options except the construction of an industrial park because municipalities generally use general obligation bonds to provide public services for the common good, such as the promotion of education through the construction and maintenance of schools, construction of a new town hall and other public goods that are certain that after its implementation will produce income for the payment of the bonds.

Decide if the following sentence is grammatically correct or incorrect Mercedes decidió comprar un auto nuevo

A type of cell which contains genetic material within the confines of a membrane-enclosed nucleus

What is 40 divided by 5

The assignment problem constraint $x_{31} + x_{32} + x_{33} + x_{34} \leq 2$ means

Which statement about Hong Kong is not true? Hong Kong is part of the Kowloon Peninsula.

Since 1997, Hong Kong has been under Chinese control.

Hong Kong has become an important manufacturing center.

Before the 1800s, Hong Kong was under British control.

Select the line from the excerpt that shows a remorseful (sorry) tone? Mom gave me a long hug, and I noticed how thin her arms had gotten, how saggy the skin on her neck was. I always thought of my mother as young, pale, rosy-cheeked and cheerful, peering shrewdly through her metal-rim glasses. Now she looked a little like an old woman. I had done that to her. The terrorists had done that to her. The Department of Homeland Security had done that to her.

A) Mom gave me a long hug ...

B) I noticed how thin her arms had gotten ...

C) I had done that to her.

D) The terrorists had done that to her.
